# 1. Executive Summary

Wisdom & Chance TCG is a free-to-play tactical trading card game that combines deep strategic deck-building with accessible, cross-platform gameplay. Players collect and craft cards across five elemental factions, build decks led by powerful Commanders, and compete in real-time PvP matches powered by a server-authoritative game engine.

The game is live today as a fully functional web application at [wisdom-and-chance.replit.app](https://wisdom-and-chance.replit.app), with a mobile companion app under active development. The current web product includes 70+ API endpoints, real-time WebSocket multiplayer, a three-currency economy, premium store with 11 products (Stripe + PayPal + in-game currency), 50-level seasonal battle pass, and 6-tier ranked competitive system.

What makes this project uniquely cost-efficient:

- Legraphics, a family-owned design business, provides the entire creative team in-house: 2 graphic designers (one doubling as game designer) and 1 video editor — at zero outsourcing cost.
- All development is done on the Replit platform using AI-assisted coding tools, eliminating DevOps overhead and reducing engineering costs by 75-85% compared to traditional studios.
- The server backend is essentially complete (6,900+ lines of server code, 128 API endpoints registered). The mobile app consumes this existing API — no server rebuilding needed.
- No outside coding specialist is required. The founder uses AI development tools on Replit to build and maintain both the web and mobile applications.

We are seeking \$50,000-\$150,000 through crowdfunding (Kickstarter/BackerKit) to fund mobile app completion, server infrastructure, marketing, and community building. Our total estimated cost to finish and maintain both apps for the first year is \$8,500-\$14,500 — a fraction of what traditional game studios spend.

## 2. Company & Team Overview

### 2.1 Legraphics — In-House Creative Studio

Legraphics is a family-owned design business that serves as both the creative and operational backbone of Wisdom & Chance TCG. The studio provides professional design, video production, and game design capabilities in-house — eliminating the single largest expense category for indie game studios.

| Role                                | Person     | Responsibilities                                           |
|-------------------------------------|------------|------------------------------------------------------------|
| Founder / Lead Developer            | Owner      | Product vision, AI-assisted development on Replit, busines |
| Graphic Designer #1 / Game Designer | Legraphics | Card art, UI design, game balance, card mechanics          |
| Graphic Designer #2                 | Legraphics | Marketing graphics, app store assets, social media visuals |
| Video Editor                        | Legraphics | Gameplay trailers, dev diaries, crowdfunding video, social |

### 2.2 No Outside Coding Hire

Unlike the previous version of this plan, we are NOT planning to hire an outside coding specialist. The founder will continue developing both the web and mobile app using AI-assisted coding tools on Replit. This is possible because:

- The server backend is essentially complete — 6,900+ lines across 8 core files, 128 registered endpoints, all game systems functional.
- AI coding tools (Replit Agent, Claude, etc.) enable a single developer to produce output comparable to a 3-4 person traditional team.
- The mobile app consumes the existing server API — it is primarily UI/frontend work, not new backend engineering.
- Replit provides hosting, database, deployment, and development environment in one platform — no DevOps expertise needed.

### 2.3 Mission & Vision

**Mission:** Create a fair, strategic, and deeply engaging trading card game that rewards skill — accessible on any device, without pay-to-win mechanics.

**Vision:** Build a thriving digital TCG universe with competitive seasons, community-driven content, and a sustainable free-to-play economy.

### 2.4 Key Differentiators

- In-House Design: Legraphics provides all art, design, and video at zero outsourcing cost.
- AI-Powered Development: One developer + AI tools = traditional team output at 80% lower cost.
- Fair F2P: All cards earnable through play. No pay-to-win.
- Server-Authoritative: Anti-cheat by design — server resolves all combat.
- Cross-Platform: Same account, same progress on web and mobile.

## 3. Product Description

### 3.1 Core Gameplay

Wisdom & Chance TCG is a turn-based card battler where two players simultaneously draw, deploy, and battle cards. Each turn follows four phases: Draw, Deployment (face-down), Combat (reveal and resolve), and Cleanup. The 8-step combat resolution system calculates buffs, debuffs, commander abilities, traits, and damage transparently.

Players build 40-card decks led by a Commander with unique abilities across five elemental factions (Fire, Water, Earth, Air, Nature).

### 3.2 Platforms

- Web App: Live at [wisdom-and-chance.replit.app](https://wisdom-and-chance.replit.app) (PWA-installable)
- Mobile App: iOS and Android app in development, consuming the same server API
- Shared Backend: Single Express.js/PostgreSQL server on Replit serves both platforms

### 3.3 Key Features

| Feature             | Description                                           | Status  |
|---------------------|-------------------------------------------------------|---------|
| Real-Time PvP       | WebSocket multiplayer with rooms, chat, spectators    | Live    |
| Ranked Seasons      | 30-day seasons, 6 ELO tiers, seasonal rewards         | Live    |
| Battle Pass         | 50-level free + premium track with rewards            | Live    |
| Economy             | Gold/Gems/Dust, crafting, disenchanting, 7 pack types | Live    |
| Premium Store       | 11 products, Stripe + PayPal + in-game currency       | Live    |
| AI Deck Builder     | Gemini AI-powered deck suggestions                    | Live    |
| Social System       | Friends, messaging, presence tracking                 | Live    |
| Daily/Weekly Quests | Challenge system with XP and gold rewards             | Live    |
| Mobile App          | Native mobile app (iOS + Android)                     | In Dev  |
| Tournaments         | Bracket-based competitive events                      | Planned |
| Guilds/Clans        | Team-based social features                            | Planned |

## 4. Market Analysis

---

### 4.1 Industry Overview

The global digital TCG market was valued at ~\$15.5 billion in 2023 and is projected to reach \$25+ billion by 2028 (CAGR ~10%). Indie entrants find success by addressing underserved niches — particularly players frustrated by pay-to-win models.

### 4.2 Target Audience

- Primary: Strategy gamers aged 16-35 frustrated by pay-to-win TCGs
- Secondary: Casual mobile gamers looking for quick tactical matches (5-10 minutes)
- Tertiary: TCG collectors who enjoy deck-building and card collection

### 4.3 Competitive Landscape

| Competitor           | Strengths                  | Our Advantage                        |
|----------------------|----------------------------|--------------------------------------|
| Hearthstone          | Massive playerbase, polish | Fair F2P; no pay-to-win              |
| MTG Arena            | Deep strategy, brand       | Simpler onboarding; cheaper to play  |
| Yu-Gi-Oh MD          | Huge IP, free gems         | Beginner-friendly; balanced meta     |
| Pokemon TCG          | Beloved IP                 | Deeper strategy for hardcore players |
| Legends of Runeterra | Generous F2P               | Active development; mobile-first     |

## 5. Business Model & Revenue Streams

### 5.1 Free-to-Play Model

Free to download and play. All cards and competitive features accessible without payment. Revenue from optional premium purchases — convenience and cosmetics, never competitive advantage.

### 5.2 Revenue Streams

| Revenue Stream         | Price Range | Type                | Est. % Revenue |
|------------------------|-------------|---------------------|----------------|
| Gem Packs              | \$1 - \$35  | Consumable          | 35%            |
| Premium Battle Pass    | \$5/season  | Seasonal            | 25%            |
| Pack Bundles           | \$3 - \$8   | Consumable          | 15%            |
| Starter/Season Bundles | \$10 - \$15 | One-Time / Seasonal | 15%            |
| Future: Cosmetics      | \$1 - \$10  | Permanent           | 10%            |

### 5.3 Product Catalog (11 Products Live)

| Product                  | USD  | Gold/Gems Alternative   |
|--------------------------|------|-------------------------|
| Starter Gems (100)       | \$1  | Real money only         |
| Popular Gems (550)       | \$4  | Real money only         |
| Value Gems (1,400)       | \$8  | Real money only         |
| Mega Gems (3,600)        | \$18 | Real money only         |
| Ultimate Gems (8,000)    | \$35 | Real money only         |
| Premium Pack Bundle (3x) | \$3  | 300 Gold / 300 Gems     |
| Element Mega Pack (5x)   | \$6  | 600 Gold / 600 Gems     |
| Legendary Hunt (5x)      | \$8  | 800 Gold / 800 Gems     |
| Premium Battle Pass      | \$5  | 500 Gold / 500 Gems     |
| Starter Bundle           | \$10 | 1,000 Gold / 1,000 Gems |
| Season Pass Bundle       | \$15 | 1,500 Gold / 1,500 Gems |

## 6. Sales Plan & Monetization Strategy

### 6.1 Sales Funnel

- Stage 1 — Acquisition: Free download via app store, social media, referral, or crowdfunding.
- Stage 2 — Onboarding: Starter collection (500 gold + cards) granted. Deck building + AI practice within 10 minutes.
- Stage 3 — Engagement: Daily/weekly challenges, battle pass XP, ranked climbing create daily habits.
- Stage 4 — Soft Monetization: After 3-7 days, Premium Store surfaces contextually. No hard gates.
- Stage 5 — Conversion: First purchase (\$1-\$5). Target: 5-10 days after install.
- Stage 6 — Retention: Seasonal resets + new battle passes create recurring 30-day purchase cycles.

### 6.2 Pricing Strategy

| Pack     | Price | Gems  | Gems/\$1 | Bonus vs Base |
|----------|-------|-------|----------|---------------|
| Starter  | \$1   | 100   | 100      | 0%            |
| Popular  | \$4   | 550   | 137.5    | +37.5%        |
| Value    | \$8   | 1,400 | 175      | +75%          |
| Mega     | \$18  | 3,600 | 200      | +100%         |
| Ultimate | \$35  | 8,000 | 228.6    | +128.6%       |

### 6.3 In-Game Sales Triggers

| Trigger                     | Product                   | Psychology                              |
|-----------------------------|---------------------------|-----------------------------------------|
| Premium BP level locked     | Premium Battle Pass (\$5) | Loss aversion: reward earned but locked |
| Out of gold for packs       | Gem Packs (\$1-\$8)       | Immediate desire + low friction         |
| Daily deal expiring         | Gems to buy the deal      | Urgency + scarcity                      |
| Win streak celebration      | Starter Bundle (\$10)     | "Treat yourself" moment                 |
| New season launches         | Season Pass Bundle (\$15) | Fresh start + best value                |
| Legendary card pulled       | More packs                | Dopamine + excitement loop              |
| Missing cards in collection | Element packs             | Completionist drive                     |

### 6.4 Key Sales Targets

| Metric                  | Industry Avg | Year 1 Target | Year 2 Target |
|-------------------------|--------------|---------------|---------------|
| Free-to-Paid Conversion | 2-5%         | 4%            | 6%            |
| ARPPU (monthly)         | \$8-\$15     | \$10          | \$14          |
| Day 1 Retention         | 35-45%       | 45%           | 50%           |
| Day 7 Retention         | 15-25%       | 22%           | 28%           |
| Day 30 Retention        | 5-12%        | 10%           | 15%           |
| LTV (paying user)       | \$30-\$80    | \$45          | \$70          |

### 6.5 Sales Forecast

| Quarter          | Users   | Payers | Avg \$/Payer | Quarterly Rev |
|------------------|---------|--------|--------------|---------------|
| Q3 2026 (Launch) | 5,000   | 200    | \$8          | \$4,800       |
| Q4 2026          | 25,000  | 1,000  | \$10         | \$30,000      |
| Q1 2027          | 60,000  | 2,400  | \$12         | \$86,400      |
| Q2 2027          | 100,000 | 4,000  | \$13         | \$156,000     |
| Q3 2027          | 150,000 | 6,000  | \$14         | \$252,000     |
| Q4 2027          | 200,000 | 8,000  | \$14         | \$336,000     |

## 7. Cost Analysis: Completing & Maintaining Both Apps

This section provides a detailed breakdown of all costs to finish development and maintain both the web and mobile apps, using ONLY the Replit platform and the Legraphics in-house team — with no outside coding hire.

### 7.1 What Is Already Built (Web App — Complete)

The web application is fully functional and live. Here is what exists today:

| System                 | Server Code   | Status   | Endpoints                 |
|------------------------|---------------|----------|---------------------------|
| Core Game Engine       | 1,200 lines   | Complete | 8-step combat, 5 elements |
| REST API (main routes) | 2,886 lines   | Complete | 75 endpoints              |
| Payment System         | 835 lines     | Complete | 12 endpoints              |
| Multiplayer & Social   | 892 lines     | Complete | 26 endpoints              |
| WebSocket Server       | 702 lines     | Complete | 20+ event types           |
| Economy Service        | 225 lines     | Complete | Pack opening, rewards     |
| Season Service         | 199 lines     | Complete | Auto-transition, rewards  |
| Frontend (React)       | 17,234 lines  | Complete | All pages + components    |
| Total                  | ~24,000 lines | LIVE     | 128 registered endpoints  |

### 7.2 What Remains to Build

#### A. Mobile App (Primary Remaining Work)

The mobile app consumes the existing server API. No new backend code is needed — it is purely frontend/UI work connecting to the 128 existing endpoints. Estimated scope:

| Mobile Feature               | Est. Replit AI Hours | Complexity | Notes                                 |
|------------------------------|----------------------|------------|---------------------------------------|
| Auth + Token Management      | 4-6 hrs              | Low        | JWT login, refresh, secure storage    |
| Card Browser + Collection    | 6-8 hrs              | Low        | List views, filters, artwork cache    |
| Deck Builder                 | 8-12 hrs             | Medium     | 40-card validation, commander select  |
| Shop + Daily Deals           | 6-8 hrs              | Low        | Catalog display, gold/gem purchase    |
| Premium Store + Payments     | 10-15 hrs            | Medium     | Stripe WebView, PayPal, currency      |
| Pack Opening Animation       | 6-10 hrs             | Medium     | Card reveal with rarity effects       |
| Battle Pass Screen           | 6-8 hrs              | Medium     | Premium track, claim, XP progress     |
| Ranked Seasons + Leaderboard | 4-6 hrs              | Low        | Tier display, history, rewards        |
| Multiplayer Game Board       | 20-30 hrs            | High       | WebSocket, game phases, combat        |
| Social (Friends, Chat)       | 8-12 hrs             | Medium     | Friend list, messaging, presence      |
| Quests + Achievements        | 4-6 hrs              | Low        | Challenge cards, claim flows          |
| Settings + Profile           | 2-4 hrs              | Low        | Profile edit, push notification prefs |
| Polish + Testing             | 10-15 hrs            | Medium     | Bug fixes, performance, UX polish     |
| TOTAL MOBILE APP             | 94-140 hrs           |            |                                       |

## B. Web App — Remaining Planned Features

| Web Feature                   | Est. Replit AI Hours | Complexity | Priority    |
|-------------------------------|----------------------|------------|-------------|
| Tournament System             | 15-25 hrs            | High       | Post-Launch |
| Guild/Clan System             | 20-30 hrs            | High       | Post-Launch |
| Card Expansion Framework      | 8-12 hrs             | Medium     | Post-Launch |
| Cosmetics System (card backs) | 6-10 hrs             | Medium     | Post-Launch |
| Esports/Streaming Integration | 10-15 hrs            | Medium     | Year 2      |
| Tablet-Optimized UI           | 8-12 hrs             | Medium     | Post-Launch |
| TOTAL WEB FEATURES            | 67-104 hrs           |            |             |

### 7.3 Development Costs (Replit + AI Tools Only)

All development is done by the founder using AI-assisted tools on the Replit platform. There is no engineering salary to account for — the founder is the developer. The only costs are the platform subscriptions:

| Item                         | Cost            | Frequency | Annual Total     |
|------------------------------|-----------------|-----------|------------------|
| Replit Core Plan             | \$25/month      | Monthly   | \$300/year       |
| Replit AI Agent Usage (est.) | \$20-\$50/month | Monthly   | \$240-\$600/year |
| Domain Name (optional)       | \$12/year       | Annual    | \$12/year        |
| TOTAL DEVELOPMENT COSTS      |                 |           | \$552-\$912/year |

### 7.4 Hosting & Infrastructure Costs

Both the web and mobile app share a single Replit-hosted server. The mobile app does not require separate hosting.

| Item                            | Cost           | Notes                                |
|---------------------------------|----------------|--------------------------------------|
| Replit Deployment (Reserved VM) | \$7-\$25/month | Scales with traffic; \$84-\$300/year |
| PostgreSQL Database (Replit)    | Included       | Bundled with Replit plan             |
| SSL/TLS Certificate             | Included       | Automatic with Replit deployment     |
| Custom Domain (optional)        | \$12/year      | wisdom-and-chance.com or similar     |
| CDN / Asset Caching             | \$0            | Replit handles static assets         |
| TOTAL HOSTING (Year 1)          |                | \$84-\$312/year                      |

### 7.5 Third-Party Service Costs

| Service                       | Cost               | When Needed                     |
|-------------------------------|--------------------|---------------------------------|
| Apple Developer Account       | \$99/year          | Required for iOS App Store      |
| Google Play Developer         | \$25 one-time      | Required for Google Play Store  |
| Stripe Payment Processing     | 2.9% + \$0.30/txn  | Per real-money transaction      |
| PayPal Payment Processing     | 2.99% + \$0.49/txn | Per PayPal transaction          |
| Push Notifications (Firebase) | \$0                | Free tier covers 100K+ users    |
| Analytics (Firebase/Replit)   | \$0                | Free tier sufficient for Year 1 |
| TOTAL FIXED THIRD-PARTY       |                    | \$124 Year 1 + per-txn fees     |

## 7.6 Marketing & Launch Costs

| Item                           | Low Estimate     | High Estimate |
|--------------------------------|------------------|---------------|
| App Store Screenshots & Assets | \$0 (Legraphics) | \$0           |
| Gameplay Trailer Video         | \$0 (Legraphics) | \$0           |
| Social Media Graphics          | \$0 (Legraphics) | \$0           |
| Crowdfunding Campaign Video    | \$0 (Legraphics) | \$0           |
| Paid Social Ads (optional)     | \$500            | \$3,000       |
| Influencer Partnerships        | \$500            | \$2,000       |
| Tournament Prize Pools         | \$500            | \$2,000       |
| Community Events & Giveaways   | \$200            | \$500         |
| Press Kit Distribution         | \$0              | \$200         |
| TOTAL MARKETING (Year 1)       | \$1,700          | \$7,700       |

Note: All visual assets (screenshots, trailers, social graphics, campaign video) are produced in-house by Legraphics at zero additional cost. This saves \$10,000-\$25,000 compared to outsourcing.

## 7.7 Legal & Business Costs

| Item                              | Cost          | Notes                             |
|-----------------------------------|---------------|-----------------------------------|
| LLC Formation (Delaware)          | \$90-\$300    | One-time; includes filing fees    |
| Terms of Service / Privacy Policy | \$0-\$500     | Template-based or attorney review |
| COPPA/GDPR Compliance Review      | \$0-\$500     | Self-audit or attorney consult    |
| Trademark (game name)             | \$250-\$400   | USPTO filing; recommended         |
| TOTAL LEGAL (Year 1)              | \$340-\$1,700 | One-time costs                    |

## 7.8 TOTAL COST SUMMARY: Year 1

### Complete Cost to Finish & Maintain Both Apps — Year 1

| Category                          | Low Estimate      | High Estimate     |
|-----------------------------------|-------------------|-------------------|
| Replit (Dev + Hosting + DB)       | \$636             | \$1,212           |
| App Store Accounts                | \$124             | \$124             |
| Payment Processing Fees           | Variable (2.9-3%) | Variable (2.9-3%) |
| Marketing & Launch                | \$1,700           | \$7,700           |
| Legal & Business                  | \$340             | \$1,700           |
| Legraphics Design Team            | \$0               | \$0               |
| Outside Developer Hire            | \$0               | \$0               |
| Contingency (10%)                 | \$280             | \$1,074           |
| <b>TOTAL YEAR 1 (FIXED COSTS)</b> | <b>\$3,080</b>    | <b>\$11,810</b>   |
| <b>TOTAL WITH MARKETING</b>       | <b>\$3,080</b>    | <b>\$11,810</b>   |

## 7.9 Cost Comparison: Our Approach vs Traditional Studio

| Category                   | Traditional Indie Studio | Legraphics + Replit | Savings |
|----------------------------|--------------------------|---------------------|---------|
| Art / Design Team (annual) | \$60,000 - \$120,000     | \$0 (in-house)      | 100%    |
| Video Production           | \$15,000 - \$30,000      | \$0 (in-house)      | 100%    |
| Dev Team (3-4 engineers)   | \$240,000 - \$400,000    | \$0 (founder + AI)  | 100%    |
| DevOps / Cloud Hosting     | \$12,000 - \$24,000      | \$636 - \$1,212     | 95-97%  |
| Marketing Visuals          | \$10,000 - \$25,000      | \$0 (Legraphics)    | 100%    |
| Total Year 1               | \$337,000 - \$599,000    | \$3,080 - \$11,810  | 97-99%  |

This means our total Year 1 cost is roughly 2% of what a comparable traditional indie game studio would spend. The Legraphics in-house team and AI-assisted Replit development eliminate the two largest expense categories: personnel and design outsourcing.

## 7.10 Ongoing Annual Maintenance Costs (Year 2+)

| Category                       | Annual Cost       | Notes                             |
|--------------------------------|-------------------|-----------------------------------|
| Replit (Dev + Hosting)         | \$636 - \$1,212   | May increase with traffic growth  |
| Apple Developer Account        | \$99              | Annual renewal                    |
| Domain Renewal                 | \$12              | If using custom domain            |
| Payment Processing             | Variable          | 2.9-3% of revenue                 |
| Content Updates (founder time) | \$0               | No salary — founder is owner      |
| Design Updates (Legraphics)    | \$0               | In-house team                     |
| Marketing (ongoing)            | \$1,000 - \$5,000 | Social ads, influencer, events    |
| TOTAL ANNUAL MAINTENANCE       | \$1,747 - \$6,323 | Excluding payment processing fees |

At scale (100,000+ users), Replit hosting costs may increase to \$50-\$100/month (\$600-\$1,200/year), but this would be offset many times over by the revenue from that user base. The cost structure remains extremely lean at all stages of growth.

## 8. Marketing & Growth Strategy

---

### 8.1 Pre-Launch (Months 1-3)

- Build email list and Discord community targeting TCG players
- Content: YouTube trailers (Legraphics video editor), dev diaries, card lore reveals
- Partner with 5-10 mid-tier gaming YouTubers/streamers for early access
- Reddit: r/cardgames, r/hearthstone, r/indiegaming communities
- Launch crowdfunding campaign (see Section 9)

### 8.2 Launch Phase (Months 4-6)

- Mobile app launch on iOS App Store and Google Play
- Press kits to gaming media (TouchArcade, Pocket Gamer, GameRant)
- Launch tournament with \$500-\$2,000 prize pool
- Referral program: 200 gems per invited friend
- ASO: screenshots and assets produced by Legraphics

### 8.3 Growth Phase (Months 7-12)

- Seasonal content drops every 30 days
- Community tournaments with leaderboard integration
- Influencer partnerships with performance-based compensation
- Localization: Spanish, Portuguese, French, German, Japanese, Korean

## 9. Crowdfunding Campaign Plan

### 9.1 Platforms

- Kickstarter: 30-day campaign for visibility and press coverage
- BackerKit: Post-campaign pledge management and late pledges
- Alternatives: Indiegogo InDemand, GameFound, Patreon for ongoing support

### 9.2 Campaign Details

Title: "Wisdom & Chance TCG — A Fair-Play Digital Card Game for Everyone"

Duration: 30 days | Goal: \$50,000 (stretch goals to \$150,000)

### 9.3 Reward Tiers

| Tier           | Price | Rewards                                         |
|----------------|-------|-------------------------------------------------|
| Supporter      | \$5   | Credits, Discord role, 500 gems                 |
| Adventurer     | \$15  | Above + Starter Bundle + exclusive card back    |
| Champion       | \$30  | Above + 3-season Premium BP + 2,000 gems        |
| Legend         | \$50  | Above + Season Pass Bundle + Commander skin     |
| Founder        | \$100 | Above + 8,000 gems + design-a-card consultation |
| Patron         | \$250 | Above + likeness as card + private Discord      |
| Mythic Founder | \$500 | Above + design a Commander + lifetime BP        |

### 9.4 Stretch Goals

| Goal            | Unlock                                    |
|-----------------|-------------------------------------------|
| \$50,000 (Base) | Mobile app completion (iOS + Android)     |
| \$65,000        | Animated card effects and premium VFX     |
| \$80,000        | Tournament system with bracket management |
| \$100,000       | Guild/Clan system with team battles       |
| \$120,000       | Full voice acting for Commanders          |
| \$150,000       | Tablet-optimized UI + landscape mode      |

Note: Since development costs are near-zero (founder + Replit AI), crowdfunding money goes primarily toward marketing, community building, prize pools, and legal setup — giving backers maximum impact per dollar.

## 10. Development Roadmap

| Phase             | Timeline   | Deliverables                            | Status      |
|-------------------|------------|-----------------------------------------|-------------|
| 1: Core Game      | Complete   | Cards, decks, combat, AI practice       | DONE        |
| 2: Economy        | Complete   | Gold/Gems/Dust, packs, crafting, shop   | DONE        |
| 3: Social         | Complete   | Friends, chat, rooms, spectator         | DONE        |
| 4: Competitive    | Complete   | Ranked seasons, battle pass, challenges | DONE        |
| 5: Payments       | Complete   | Stripe, PayPal, premium store           | DONE        |
| 6: Mobile App     | Q2-Q3 2026 | iOS + Android app                       | In Progress |
| 7: Tournaments    | Q3 2026    | Bracket system, prize pools             | Planned     |
| 8: Guilds         | Q4 2026    | Clans, team battles                     | Planned     |
| 9: Card Expansion | Q1 2027    | New cards, elements, commanders         | Planned     |
| 10: Esports       | Q2 2027    | Organized play, streaming               | Planned     |

All development performed by the founder on Replit using AI-assisted tools. Legraphics handles all creative assets. No outside hires needed at any phase.

## 11. Financial Projections

### 11.1 Revenue Projections

| Period   | Users   | Payers (4%) | Monthly Rev | Cumulative |
|----------|---------|-------------|-------------|------------|
| Month 6  | 10,000  | 400         | \$4,000     | \$12,000   |
| Month 9  | 30,000  | 1,200       | \$12,000    | \$48,000   |
| Month 12 | 75,000  | 3,000       | \$30,000    | \$120,000  |
| Month 18 | 150,000 | 6,000       | \$60,000    | \$360,000  |
| Month 24 | 250,000 | 10,000      | \$100,000   | \$780,000  |

### 11.2 Profit Margins (Legraphics + Replit Model)

Because our fixed costs are \$3,080-\$11,810/year and variable costs are only payment processing (2.9-3%), our profit margins are exceptionally high compared to industry norms:

| Monthly Revenue | Fixed Costs/Mo | Processing (3%) | Net Profit        | Margin |
|-----------------|----------------|-----------------|-------------------|--------|
| \$4,000         | \$260-\$985    | \$120           | \$2,895-\$3,620   | 72-91% |
| \$12,000        | \$260-\$985    | \$360           | \$10,655-\$11,380 | 89-95% |
| \$30,000        | \$260-\$985    | \$900           | \$28,115-\$28,840 | 94-96% |
| \$100,000       | \$260-\$985    | \$3,000         | \$96,015-\$96,740 | 96-97% |

These margins are possible because Legraphics absorbs all design costs and the founder absorbs all development costs. The only ongoing expenses are platform fees and payment processing.

## 12. Funding Requirements & Use of Funds

With near-zero development and design costs, crowdfunding dollars go directly to growth and community:

### 12.1 Minimum: \$50,000

| Category                        | Amount   | %   |
|---------------------------------|----------|-----|
| Marketing & User Acquisition    | \$18,000 | 36% |
| Tournament Prize Pools          | \$8,000  | 16% |
| Replit Infrastructure (2 years) | \$2,500  | 5%  |
| Legal (LLC, TOS, Trademark)     | \$3,000  | 6%  |
| App Store Accounts              | \$150    | <1% |
| Community Events & Merch        | \$5,000  | 10% |
| Crowdfunding Fees (~8%)         | \$4,000  | 8%  |
| Backer Reward Fulfillment       | \$5,000  | 10% |
| Contingency                     | \$4,350  | ~9% |

### 12.2 Target: \$100,000

| Category                             | Amount   | %   |
|--------------------------------------|----------|-----|
| Marketing & Paid UA                  | \$35,000 | 35% |
| Tournament Prize Pools               | \$15,000 | 15% |
| Replit Infrastructure (3 years)      | \$4,000  | 4%  |
| Legal & Business                     | \$5,000  | 5%  |
| Community Building & Events          | \$10,000 | 10% |
| Merchandise (designed by Legraphics) | \$8,000  | 8%  |
| Localization (6 languages)           | \$5,000  | 5%  |
| Crowdfunding Fees                    | \$8,000  | 8%  |
| Backer Rewards                       | \$5,000  | 5%  |
| Contingency                          | \$5,000  | 5%  |

### 12.3 Stretch: \$150,000

Additional \$50,000: expanded marketing budget (\$20,000), animated card effects and VFX (\$10,000), voice acting for commanders (\$8,000), physical merchandise production (\$7,000), additional language localizations (\$5,000).

## 13. Risk Analysis & Mitigation

| Risk                      | Likelihood | Impact | Mitigation                             |
|---------------------------|------------|--------|----------------------------------------|
| Low user adoption         | Medium     | High   | Community pre-launch; referral program |
| Competitor response       | Medium     | Medium | Fair F2P niche; loyal community        |
| Solo developer bottleneck | Medium     | Medium | AI tools 4x output; MVP is done        |
| Server scaling needed     | Low        | Low    | Replit auto-scales; upgrade plan       |
| App store rejection       | Low        | High   | Follow guidelines; transparent odds    |
| Crowdfunding miss         | Medium     | Low    | Dev costs are near-zero; can self-fund |
| Player churn              | High       | Medium | 30-day seasons; weekly content         |
| Payment fraud             | Low        | Medium | Stripe/PayPal built-in protection      |
| Founder burnout           | Medium     | High   | Legraphics team shares workload        |

### 13.1 Regulatory

- Loot Box Compliance: Exact odds displayed (60/25/10/5%). Compliant with EU requirements.
- Age Rating: No gambling. Target PEGI 7 / ESRB E10+.
- Privacy: GDPR/CCPA compliant. Minimal data collection.
- Payments: PCI handled by Stripe/PayPal. No card data on our servers.

## 14. Appendix

---

### 14.1 Technical Stack

- Platform: Replit (development, hosting, database, deployment — all-in-one)
- Frontend: React 18, TypeScript, Tailwind CSS, shadcn/ui, TanStack Query
- Backend: Express.js, TypeScript, PostgreSQL (Drizzle ORM), WebSocket
- Payments: Stripe Checkout + PayPal REST API
- AI: Google Gemini 2.5 Flash (deck suggestions + card art)
- Auth: Replit Auth (OIDC) + JWT for mobile

### 14.2 Live Product

- Web App: <https://wisdom-and-chance.replit.app>
- API Docs: <https://wisdom-and-chance.replit.app/api/api-docs>

### 14.3 Codebase Stats

- Server Code: 6,939 lines across 8 core files
- Frontend Code: 17,234 lines (pages + components)
- Total: ~24,000 lines of TypeScript
- API Endpoints: 128 registered
- Products in Store: 11
- Payment Methods: 3 (Stripe, PayPal, In-Game Currency)
