

WHAT IT IS
A fully playable tactical trading card game — available as a web app (browser/PC) and native mobile app (iOS & Android). Players collect cards, build decks, and battle in real-time 1v1 matches or against AI. Live server, real accounts, real economy.

- GAME RULES — QUICK REFERENCE**
- **Deck Size:** 40 cards
 - **Deck Structure:** Exactly 4 cards of each power rank 1–10
 - **Max Copies:** 3 of any single card
 - **Commander:** 1 per player (command zone, not the deck)
 - **Starting HP:** 40 each
 - **Opening Hand:** 5 cards

- Turn Phases (both players act simultaneously):**
1. Draw — Draw 2 cards
 2. Deployment — Play up to 2 face-down cards; use deployment commander abilities
 3. Combat — Flip all deployed cards; use combat commander abilities
 4. Calculation — 8-step: reveal !' power calc !' Quick Strike !' Guardian !' healing !' winner !' damage !' Care Package
 5. End — Check win conditions
- 5 Elements:** Fire (offense) • Water (control) • Earth (defense) • Air (speed) • Nature (healing)
- 4 Card Traits:** &j Quick Strike (direct HP) • Ø=Þáp Guardian (blocks damage) • Ø=Ůš Restoration (heals) • '• Care Package (draw)
- Win Condition:** Reduce opponent to 0 HP, or opponent empties their deck.

- STRENGTHS (PROS)**
- **Fully playable today:** Not a prototype — real accounts, matchmaking, and progression work now
 - **Dual platform:** Web + native mobile app from one shared server and database
 - **Deep strategy:** 5 elements, 4 commander ability types, 4 traits, ELO ranked seasons, simultaneous play
 - **Engagement built-in:** Daily/weekly challenges, achievements, battle pass, leaderboard, season rewards
 - **Monetization ready:** Stripe + PayPal integrated; gem packs, battle pass (\$5), starter bundle (\$10), season pass (\$15)
 - **AI-powered:** Gemini AI deck suggestions + AI card art generation (admin tools)
 - **Low barrier to entry:** Sign in with Replit or Google (web) / email (mobile); starter pack = 500 gold + all Common/Rare cards

- GAPS TO ADDRESS (CONS)**
- **Card art sparse:** AI generation exists but must be applied card-by-card; bulk art not complete
 - **Mobile login UX:** Web app shows mobile panel on some devices; fix is ready to deploy
 - **Payment keys needed:** PayPal/Stripe integrated but inactive until production API credentials are added
 - **App store not live:** EAS build pipeline configured; submission to Apple/Google Play pending
 - **Single server:** One Replit deployment; scaling/SLA investment needed at growth stage

- BUSINESS PLAN — KEY THOUGHTS**
1. Freemium model is correct — starter rewards hook players before the premium wall appears
 2. Battle Pass at \$5/season is underpriced; consider Free / \$5 Standard / \$10 Premium tiered pass
 3. "Play anywhere, same account" dual-platform is a real differentiator — lead with this in marketing
 4. Art completion is priority #1 before monetization launch — players won't buy packs for invisible cards
 5. Spectator mode + live match viewer are built — use them to drive community/tournament engagement
