1. Executive Summary

Wisdom & Chance TCG is a free-to-play tactical trading card game (TCG) that combines deep strategic deck-building with accessible, cross-platform gameplay. Players collect and craft cards across five elemental factions (Fire, Water, Earth, Air, Nature), build decks led by powerful Commanders, and compete in real-time player-vs-player (PvP) matches powered by a server-authoritative game engine.

The game is live today as a fully functional web application at wisdom-and-chance.replit.app, with a mobile companion app under active development. The current product features:

- 70+ API endpoints powering gameplay, economy, social, and payment systems
- Real-time multiplayer with WebSocket-based PvP, rooms, spectator mode, and chat
- A complete three-currency economy (Gold, Gems, Dust) with crafting, disenchanting, and pack opening
- Premium store with 11 products, supporting Stripe (card/Google Pay), PayPal, and in-game currency
- 50-level seasonal battle pass with free and premium reward tracks
- 6-tier ranked competitive system with ELO ratings and seasonal resets
- AI-powered features: deck suggestions (Gemini AI) and admin card art generation

The project is backed by Legraphics, a family-owned design studio providing an in-house creative team of two graphic designers and a video editor. One designer also serves as the game designer and balance lead. All development is built on the Replit platform, and the only planned post-campaign hire is a single AI coding specialist to accelerate mobile and feature development.

We are seeking \$50,000-\$150,000 in initial funding through a crowdfunding campaign (Kickstarter/BackerKit) to fund mobile app development, server infrastructure scaling, art production, and community building. The digital TCG market is projected to exceed \$25 billion by 2028, and Wisdom & Chance is positioned to capture the growing segment of players who want strategic depth without pay-to-win mechanics.

2. Company Overview

Mission Statement

To create a fair, strategic, and deeply engaging trading card game that rewards skill and creativity — accessible to everyone on any device, without pay-to-win mechanics.

Vision

Build a thriving digital TCG universe with competitive seasons, community-driven content, and a sustainable free-to-play economy where every player can compete at the highest level without spending money.

Legal Structure

To be incorporated as an LLC (recommended: Delaware LLC for investor flexibility). Currently operating under Legraphics, a family-owned design business.

Legraphics — In-House Creative Studio

Legraphics is the family design business that provides the creative backbone for Wisdom & Chance TCG. The studio brings professional design, video, and game design capabilities in-house — eliminating the need to outsource creative work and significantly reducing costs compared to competitors who contract these roles.

Key Differentiators

- In-House Design Team: Legraphics provides card art, UI design, marketing assets, and video content at zero outsourcing cost.
- Fair F2P: All gameplay-relevant cards are earnable through play. No pay-to-win card packs.
- Server-Authoritative: Anti-cheat by design — the server resolves all combat, preventing client manipulation.
- Cross-Platform: Same account, same progress on web and mobile (iOS/Android).
- AI-Enhanced: Gemini AI powers deck suggestions and card art generation.
- Lean Operation: AI-assisted development on Replit keeps engineering costs minimal while maintaining quality.
- Community-First: Open competitive seasons, public leaderboards, friend systems, spectator mode.

3. Product Description

3.1 Core Gameplay

Wisdom & Chance TCG is a turn-based card battler where two players simultaneously draw, deploy, and battle cards. Each turn follows four phases: Draw, Deployment (face-down), Combat (reveal and resolve), and Cleanup. The 8-step combat resolution system calculates buffs, debuffs, commander abilities, traits, and damage in a transparent, skill-based flow.

Players build 40-card decks led by a Commander who provides unique abilities (group buffs, shields, first strikes, heals, extra deployments). Five elemental factions create a rich interaction layer.

3.2 Platforms

- Web App: Live at wisdom-and-chance.replit.app (PWA-installable)
- Mobile App: Native iOS and Android app in development
- Shared Backend: Single Express.js/PostgreSQL server serves both platforms via REST API + WebSocket

3.3 Key Features

Feature	Description	Status
Real-Time PvP	WebSocket multiplayer with rooms, chat, spectators	Live
Ranked Seasons	30-day seasons, 6 ELO tiers, seasonal rewards	Live
Battle Pass	50-level free + premium track with rewards	Live
Economy	Gold/Gems/Dust, crafting, disenchanting	Live
Premium Store	11 products, Stripe + PayPal + currency	Live
AI Deck Builder	Gemini AI-powered deck suggestions	Live
Social System	Friends, messaging, presence tracking	Live
Daily/Weekly Quests	Challenge system with XP and gold rewards	Live
Mobile App	Native mobile app (iOS + Android)	In Dev
Tournaments	Bracket-based competitive events	Planned
Guilds/Clans	Team-based social features	Planned

4. Market Analysis

4.1 Industry Overview

The global digital trading card game market was valued at approximately \$15.5 billion in 2023 and is projected to reach \$25+ billion by 2028 (CAGR ~10%). The segment is dominated by established titles like Hearthstone, Magic: The Gathering Arena, Yu-Gi-Oh! Master Duel, and Pokemon TCG Live, but indie and mid-tier entrants continue to find success by addressing underserved niches.

4.2 Target Audience

- Primary: Strategy gamers aged 16-35 who enjoy TCGs but are frustrated by pay-to-win monetization
- Secondary: Casual mobile gamers looking for quick, tactical matches (5-10 minutes)
- Tertiary: TCG collectors who enjoy deck-building and card collection as a core loop

4.3 Competitive Landscape

Competitor	Strengths	Weakness We Address
Hearthstone	Massive playerbase, polish	Expensive to compete; pay-to-win perception
MTG Arena	Deep strategy, brand	Complex for new players; expensive wildcards
Yu-Gi-Oh MD	Huge IP, free gems	Overwhelming combo meta; not beginner-friendly
Pokemon TCG	Beloved IP	Limited strategic depth for hardcore players
Legends of Runeterra	Generous F2P	Declining updates; Riot deprioritizing

4.4 Our Competitive Advantage

- No pay-to-win: All cards earnable through gameplay. Premium purchases are cosmetic/convenience.
- Simultaneous play: Both players act at the same time, reducing wait and increasing engagement.
- Server-authoritative: Zero cheating possible in PvP — the server validates every action.
- AI integration: Smart deck suggestions lower the barrier for new players.
- Cross-platform from day one: Web + mobile with unified accounts and progression.

5. Business Model & Revenue Streams

5.1 Free-to-Play Model

Wisdom & Chance TCG is free to download and play. All cards, game modes, and competitive features are accessible without payment. Revenue is generated through optional premium purchases that provide convenience, cosmetic enhancements, and progression acceleration — never competitive advantage.

5.2 Revenue Streams

Revenue Stream	Price Range	Type	Est. % Revenue
Gem Packs	\$1 - \$35	Consumable	35%
Premium Battle Pass	\$5/season	Seasonal	25%
Pack Bundles	\$3 - \$8	Consumable	15%
Starter/Season Bundles	\$10 - \$15	One-Time / Seasonal	15%
Future: Cosmetics	\$1 - \$10	Permanent	10%

5.3 Current Product Catalog

Product	Price (USD)	Also Buyable With
Starter Gems (100)	\$1	Real money only
Popular Gems (550)	\$4	Real money only
Value Gems (1,400)	\$8	Real money only
Mega Gems (3,600)	\$18	Real money only
Ultimate Gems (8,000)	\$35	Real money only
Premium Pack Bundle (3x)	\$3	300 Gold / 300 Gems
Element Mega Pack (5x)	\$6	600 Gold / 600 Gems
Legendary Hunt (5x)	\$8	800 Gold / 800 Gems
Premium Battle Pass	\$5	500 Gold / 500 Gems
Starter Bundle	\$10 (one-time)	1,000 Gold / 1,000 Gems
Season Pass Bundle	\$15	1,500 Gold / 1,500 Gems

5.4 Payment Infrastructure

The payment system is fully operational with three payment methods:

- Stripe: Credit/debit cards + Google Pay + Apple Pay (via Stripe Checkout)
- PayPal: Direct PayPal checkout with order creation and capture flow
- In-Game Currency: Gold and Gems earned through gameplay can purchase most items

All transactions are tracked, idempotent, and protected against race conditions with database-level locking.

6. Sales Plan & Monetization Strategy

6.1 Sales Philosophy

Our sales approach is built on a "value-first" principle: players must feel rewarded and engaged before they ever see a purchase prompt. The game gives generous free rewards, and premium offers are positioned as enhancements to an already great experience — not as requirements to compete.

6.2 Sales Funnel

The player journey from download to paying customer follows a carefully designed funnel:

- Stage 1 — Acquisition: Player discovers the game through app store, social media, referral, or crowdfunding. Downloads for free.
- Stage 2 — Onboarding: Starter collection granted automatically (500 gold + 2x every Common/Rare card). Player experiences deck building, AI practice matches, and pack opening within first 10 minutes.
- Stage 3 — Engagement: Daily login rewards, daily challenges, weekly challenges, and battle pass XP create daily return habits. Players join ranked matches and climb tiers.
- Stage 4 — Soft Monetization: After 3-7 days of play, the Premium Store surfaces contextually — "Unlock Premium Battle Pass to claim this reward" or "Get more gems to open this pack." No hard gates.
- Stage 5 — Conversion: Player makes first purchase (typically \$1-\$5 gem pack or \$5 battle pass). Average time to first purchase target: 5-10 days.
- Stage 6 — Retention & Upsell: Seasonal resets, new battle passes, and limited-time bundles create recurring purchase opportunities every 30 days.

6.3 Pricing Strategy

Our pricing follows mobile gaming industry best practices with psychological anchoring:

- Entry Price Point (\$1): Starter Gems pack — removes the "free player" identity barrier with minimal commitment.
- Sweet Spot (\$4-\$8): Popular Gems and pack bundles — best value perception, drives highest volume.
- Premium Tier (\$10-\$15): Starter Bundle and Season Pass — positioned as "best deal in the game" for committed players.
- Whale Tier (\$18-\$35): Mega and Ultimate gem packs — for enthusiasts who want maximum gems with bonus amounts.

Gem bonus scaling creates clear value perception:

Pack	Price	Gems	Gems/\$1	Bonus
Starter	\$1	100	100	0%
Popular	\$4	550	137.5	+37.5%
Value	\$8	1,400	175	+75%
Mega	\$18	3,600	200	+100%
Ultimate	\$35	8,000	228.6	+128.6%

6.4 In-Game Sales Triggers

Strategic moments where purchase prompts naturally appear without being intrusive:

Trigger Moment	Product Shown	Conversion Psychology
Player tries to claim premium BP level	Premium Battle Pass (\$5)	Loss aversion: reward earned but locked
Player runs out of gold for a pack	Gem Packs (\$1-\$8)	Immediate desire + low friction
Daily deal with 30% discount expires	Gem Packs to buy the deal	Urgency + scarcity
First ranked win streak (3+)	Starter Bundle (\$10)	Celebration moment
Season ends, new BP launches	Season Pass Bundle (\$15)	Fresh start + best value framing
Player opens pack, gets Legendary	More packs / bundles	Excitement + dopamine loop
Collection screen: missing cards	Packs for that element	Completionist motivation

6.5 Seasonal Sales Cycle

Each 30-day season creates a natural sales rhythm:

Period	Duration	Sales Focus	Expected Revenue Lift
Season Launch	Days 1-3	Premium BP + Season Pass Bundle	+40% vs baseline
Early Season	Days 4-10	Gem packs + pack bundles	Baseline
Mid-Season	Days 11-20	Daily deals + element packs	Baseline
Late Season Push	Days 21-27	"Last chance" BP upgrade + gem packs	+25% vs baseline
Season Finale	Days 28-30	Next season teaser + bundle offers	+30% vs baseline

6.6 Sales Channels

- In-App Store: Primary revenue channel. Premium Store tab + contextual prompts throughout the game.
- Web App Store: Same product catalog accessible via browser for web players.
- App Store / Google Play: Mobile in-app purchases handled through Stripe checkout (avoids 30% platform fee on first-party payment processing where allowed).
- Crowdfunding (Kickstarter/BackerKit): Pre-launch revenue + community building (see Section 8).
- Direct Sales (Future): Website-based gem purchases at discounted rates vs app store pricing.

6.7 Key Sales Metrics & Targets

Metric	Industry Avg	Our Target (Y1)	Our Target (Y2)
Free-to-Paid Conversion	2-5%	4%	6%
ARPPU (monthly)	\$8-\$15	\$10	\$14
ARPDau	\$0.05-\$0.15	\$0.08	\$0.12
Day 1 Retention	35-45%	45%	50%
Day 7 Retention	15-25%	22%	28%
Day 30 Retention	5-12%	10%	15%
Time to First Purchase	3-14 days	7 days	5 days
Monthly Churn (payers)	10-20%	15%	10%
LTV (paying user)	\$30-\$80	\$45	\$70

6.8 Upsell & Cross-Sell Strategy

- Bundle Upgrades: After buying Popular Gems (\$4), show "Upgrade to Value Gems for just \$4 more and get 3x the gems."
- Battle Pass Upsell: Free BP players who reach level 25+ see a "You have 5 premium rewards waiting" banner.
- Seasonal Bundles: Time-limited bundles at season transitions create urgency and perceived exclusive value.
- Referral Rewards: Players who invite friends earn 200 gems per referral — encouraging organic growth.
- Loyalty Tiers (Future): Cumulative spending unlocks exclusive cosmetics, creating a reason to keep purchasing.

6.9 Anti-Churn Sales Tactics

Keeping paying players engaged and spending is more cost-effective than acquiring new ones:

- Win-Back Offers: Players inactive for 7+ days receive a "Welcome Back" bundle at 50% discount.
- Streak Protection: "Don't lose your 7-day login streak! Log in today for bonus gems."
- Season FOMO: "Only 5 days left to claim your battle pass rewards — upgrade now!"
- New Content Drops: Card expansions and new commanders create reasons to buy more packs.
- Social Pressure: Friends list shows tier badges and premium BP status, motivating competitive purchases.

6.10 B2B & Partnership Sales (Future)

Beyond direct-to-consumer, several B2B revenue channels can be developed:

- Esports Sponsorships: Tournament sponsors pay for branded events, card backs, and in-game advertising.
- Content Creator Program: Revenue sharing with streamers/YouTubers who drive installs via affiliate links.
- White-Label Licensing: License the game engine and platform to other card game IP holders.
- Merchandise: Physical card sets, playmats, and apparel — designed in-house by Legraphics, sold online and at gaming conventions.
- Educational Licensing: Simplified version for schools teaching strategy, probability, and resource management.

6.11 Sales Forecast Summary

Quarter	Users	Payers	Avg Rev/Payer	Quarterly Rev
Q3 2026 (Launch)	5,000	200	\$8	\$4,800
Q4 2026	25,000	1,000	\$10	\$30,000
Q1 2027	60,000	2,400	\$12	\$86,400
Q2 2027	100,000	4,000	\$13	\$156,000
Q3 2027	150,000	6,000	\$14	\$252,000
Q4 2027	200,000	8,000	\$14	\$336,000
Year 1 Total				\$277,200
Year 2 Total				\$865,200

7. Marketing & Growth Strategy

7.1 Pre-Launch (Months 1-3)

- Build email list and Discord community targeting TCG players
- Content marketing: YouTube gameplay trailers (produced by Legraphics video editor), dev diaries, card lore reveals
- Partner with 5-10 mid-tier gaming YouTubers/streamers for early access coverage
- Reddit engagement: r/cardgames, r/hearthstone, r/indiegaming communities
- Launch crowdfunding campaign (see Section 8)
- Legraphics produces all campaign visuals, promotional graphics, and video content in-house

7.2 Launch Phase (Months 4-6)

- Mobile app launch on iOS App Store and Google Play Store
- Press kit distribution to gaming media (TouchArcade, Pocket Gamer, GameRant)
- Launch tournament with prize pool (\$500-\$2,000) to drive competitive interest
- Referral program: Invite friends, earn gems (200 gems per referral)
- App Store Optimization (ASO): screenshots, keywords, localized descriptions — all visual assets by Legraphics

7.3 Growth Phase (Months 7-12)

- Seasonal content drops every 30 days to maintain engagement
- Community tournaments with leaderboard integration
- Influencer partnerships with performance-based compensation
- Cross-promotion with other indie games
- Localization: Spanish, Portuguese, French, German, Japanese, Korean

7.4 User Acquisition Targets

Milestone	Timeline	Users	Revenue Target
Soft Launch	Month 4	1,000	\$500/mo
Public Launch	Month 6	10,000	\$3,000/mo
Growth Phase	Month 9	50,000	\$15,000/mo
Maturity	Month 12	100,000+	\$35,000/mo

8. Crowdfunding Campaign Plan

8.1 Platform Recommendation

We recommend a dual-platform approach:

- **Kickstarter:** For initial campaign visibility, press coverage, and community building. Kickstarter has the largest audience for games and provides built-in discovery. Best for the initial 30-day campaign.
- **BackerKit:** For post-campaign pledge management, late pledges, and add-on sales. BackerKit extends the funding window indefinitely. Also consider BackerKit Launch as a Kickstarter alternative.
- **Alternative Platforms:** Indiegogo (InDemand for ongoing funding), GameFound (TCG-focused audience), Patreon (ongoing monthly support).

8.2 Campaign Structure

Campaign Title: "Wisdom & Chance TCG — A Fair-Play Digital Card Game for Everyone"

Campaign Duration: 30 days

Funding Goal: \$50,000 (minimum viable) with stretch goals to \$150,000

8.3 Reward Tiers

Tier	Price	Rewards
Supporter	\$5	Name in credits, Discord role, 500 bonus gems
Adventurer	\$15	Above + Starter Bundle + exclusive card back
Champion	\$30	Above + Premium Battle Pass (3 seasons) + 2,000 gems
Legend	\$50	Above + Season Pass Bundle + exclusive Commander skin
Founder	\$100	Above + 8,000 gems + design-a-card consultation
Patron	\$250	Above + your likeness as a card + private Discord
Mythic Founder	\$500	Above + design a Commander + lifetime Battle Pass

8.4 Stretch Goals

Goal	Unlock
\$50,000 (Base)	Mobile app development (iOS + Android)
\$65,000	Animated card effects and premium VFX
\$80,000	Tournament system with bracket management
\$100,000	Guild/Clan system with team battles
\$120,000	Full voice acting for Commanders
\$150,000	Tablet-optimized UI + landscape mode

8.5 Campaign Marketing Timeline

- **Week -4:** Announce campaign, build landing page, begin email collection
- **Week -2:** Release gameplay trailer (produced by Legraphics), send press kits
- **Week -1:** Early access invites to email list, Discord announcements
- **Day 1:** Launch with 48-hour early bird pricing (20% off tiers)
- **Week 1-2:** Daily updates, behind-the-scenes content, community Q&A
- **Week 3:** Mid-campaign push with influencer partnerships
- **Week 4:** Final 48-hour countdown, unlock final stretch goal, thank-you video
- **Post-Campaign:** Move to BackerKit for late pledges and add-on management

9. Development Roadmap

Phase	Timeline	Deliverables	Status
1: Core Game	Complete	Cards, decks, combat, AI practice	DONE
2: Economy	Complete	Gold/Gems/Dust, packs, crafting, shop	DONE
3: Social	Complete	Friends, chat, rooms, spectator mode	DONE
4: Competitive	Complete	Ranked seasons, battle pass, challenges	DONE
5: Payments	Complete	Stripe, PayPal, premium store	DONE
6: Mobile App	Q2-Q3 2026	Native iOS + Android app	In Progress
7: Tournaments	Q3 2026	Bracket system, prize pools	Planned
8: Guilds	Q4 2026	Clans, team battles, guild wars	Planned
9: Expansion	Q1 2027	New cards, elements, commanders	Planned
10: Esports	Q2 2027	Organized play, streaming integration	Planned

Development Approach

All current and future development is done on the Replit platform, which provides cloud-based IDE, hosting, database, and deployment in a single environment. This approach:

- Eliminates DevOps overhead — no separate hosting, CI/CD, or server management needed
- Enables rapid AI-assisted development using Replit Agent and AI coding tools
- Allows the founder and future AI coding specialist to collaborate in real-time on the same codebase
- Provides instant deployment — every code change can go live in seconds

Technical Completion (8 Tasks)

- Task 1: Combat engine with Guardian & Quick Strike mechanics
- Task 2: API documentation and rules page
- Task 3: Server configuration and feature flags
- Task 4: Three-currency economy with crafting and collection
- Task 5: Mobile sync guide and development roadmap
- Task 6: Shop system with 7 pack types and daily deals
- Task 7: Ranked seasons, 50-level battle pass, weekly challenges
- Task 8: Full payment integration (Stripe + PayPal + in-game currency)

Total codebase: 70+ API endpoints, WebSocket multiplayer, PostgreSQL database, React 18 frontend.

10. Team & Organizational Structure

10.1 Legraphics — Creative & Design Team (In-House)

Legraphics is a family-owned design business that serves as the creative arm of the Wisdom & Chance TCG project. Having an in-house design team is a significant competitive advantage — most indie game studios outsource art and design at \$50-\$150/hour, while Legraphics provides these capabilities at no additional cost.

Role	Person	Responsibilities
Founder / Lead Developer	Owner	Product vision, game design, AI-assisted development on
Graphic Designer #1 / Game Designer	Legraphics	Card art, UI design, game balance, card mechanics design
Graphic Designer #2	Legraphics	Marketing graphics, app store assets, social media cont
Video Editor	Legraphics	Gameplay trailers, dev diaries, crowdfunding video, soc

10.2 Post-Campaign Hire: AI Coding Specialist

After a successful crowdfunding campaign, the single planned hire is an AI Coding Specialist / Developer. This person will:

- Work alongside the founder on the Replit platform — the same environment used for all current development
- Focus on mobile app development (React Native or Flutter) consuming the existing 70+ endpoint API
- Leverage AI coding tools (Replit Agent, GitHub Copilot, Claude) to maximize output
- Build planned features: tournament system, guild/clan system, and card expansion framework
- Estimated cost: \$60,000-\$90,000/year (full-time) or \$40-\$60/hour (contract)

10.3 Why Only One Hire

The lean team strategy is intentional and sustainable:

- AI-assisted development on Replit means one skilled developer can produce output comparable to a team of 3-4 traditional developers
- The existing server backend is complete — the new hire focuses purely on mobile and new features, not rebuilding infrastructure
- Legraphics handles all design, art, and video work — no need to hire creatives
- The founder continues as lead developer and product owner, maintaining product vision
- As revenue grows, additional hires can be made from operating profits rather than requiring more fundraising

10.4 Organizational Chart

Founder / CEO

```
|-- Legraphics Creative Team
|   |-- Graphic Designer #1 / Game Designer
|   |-- Graphic Designer #2
|   |-- Video Editor
|
|-- AI Coding Specialist (Post-Campaign Hire)
```

10.5 Advisory Board (To Be Recruited)

- TCG Industry Veteran: Former designer or producer from Blizzard, Wizards of the Coast, or similar
- Mobile Gaming Advisor: Executive with F2P mobile game launch experience
- Esports Consultant: Experience building competitive gaming communities

11. Financial Projections

11.1 Revenue Model Assumptions

- Conversion rate (free to paying): 3-5% (industry average for F2P games)
- Average Revenue Per Paying User (ARPPU): \$8-\$15/month
- Monthly churn rate: 15-20% (with seasonal content keeping engagement high)
- Lifetime Value (LTV) per paying user: \$40-\$75
- User Acquisition Cost (UAC): \$1-\$3 via organic/community channels

11.2 Revenue Projections (Conservative)

Period	Total Users	Paying Users (4%)	Monthly Rev	Cumulative
Month 6	10,000	400	\$4,000	\$12,000
Month 9	30,000	1,200	\$12,000	\$48,000
Month 12	75,000	3,000	\$30,000	\$120,000
Month 18	150,000	6,000	\$60,000	\$360,000
Month 24	250,000	10,000	\$100,000	\$780,000

11.3 Cost Structure (Monthly at Scale)

Our cost structure is significantly leaner than competitors thanks to Legraphics providing in-house design and the Replit platform eliminating DevOps costs:

Category	Month 6	Month 12	Month 24
Replit Pro + Server Hosting	\$200	\$500	\$1,500
Payment Processing (3%)	\$120	\$900	\$3,000
AI Coding Specialist	\$0	\$6,000	\$7,500
Marketing	\$500	\$2,000	\$5,000
Legraphics (in-house)	\$0	\$0	\$0
Misc (legal, tools)	\$200	\$500	\$1,000
Total Monthly Costs	\$1,020	\$9,900	\$18,000
Net Monthly Profit	\$2,980	\$20,100	\$82,000

11.4 Break-Even Analysis

With the lean cost structure (no outsourced design, Replit hosting, single developer hire), the project reaches break-even by Month 8-10 post mobile launch. This is 2-4 months earlier than traditional indie game studios due to the Legraphics in-house advantage and AI-assisted development.

11.5 Cost Advantage vs Traditional Studio

A comparable indie TCG studio would spend approximately:

Cost Category	Traditional Studio	Wisdom & Chance	Savings
Art/Design (annual)	\$60,000 - \$120,000	\$0 (Legraphics)	100%
Video Production	\$15,000 - \$30,000	\$0 (Legraphics)	100%
Development Team (3-4 devs)	\$240,000 - \$400,000	\$60,000 - \$90,000	75-85%
DevOps / Hosting	\$12,000 - \$24,000	\$2,400 - \$6,000	75-80%
Total Year 1	\$327,000 - \$574,000	\$62,400 - \$96,000	~80%

12. Funding Requirements & Use of Funds

12.1 Minimum Viable Funding: \$50,000

Category	Amount	% of Funds
AI Coding Specialist (6 mo contract)	\$25,000	50%
Server Infrastructure (12 mo)	\$3,000	6%
Marketing & User Acquisition	\$10,000	20%
Legal (LLC, Terms, Privacy)	\$3,000	6%
Tournament Prize Pools	\$2,000	4%
Crowdfunding Fees & Fulfillment	\$4,000	8%
Contingency	\$3,000	6%

Note: Card art and visual asset production is handled in-house by Legraphics at no additional cost.

12.2 Target Funding: \$100,000

Category	Amount	% of Funds
AI Coding Specialist (12 mo)	\$50,000	50%
Server Infrastructure (18 mo)	\$5,000	5%
Marketing & UA	\$18,000	18%
Tournament Prize Pools	\$8,000	8%
Legal & Business Setup	\$5,000	5%
Community Growth (events, merch)	\$5,000	5%
Crowdfunding Fees & Fulfillment	\$5,000	5%
Contingency	\$4,000	4%

12.3 Stretch Funding: \$150,000

Additional \$50,000 allocated to: AI coding specialist salary increase to retain top talent (\$15,000), animated card effects and premium VFX (\$10,000), voice acting for commanders (\$8,000), expanded marketing (\$12,000), and merchandise production designed by Legraphics (\$5,000).

13. Risk Analysis & Mitigation

Risk	Likelihood	Impact	Mitigation
Low user adoption	Medium	High	Community building pre-launch; referral program
Competitor response	Medium	Medium	Differentiate on fairness; niche positioning
Server costs spike	Low	Medium	Auto-scaling; Replit cost monitoring
Payment fraud	Low	Medium	Stripe/PayPal built-in fraud prevention
Key person risk	Medium	High	Document everything; Legraphics continuity
App store rejection	Low	High	Follow guidelines; no loot box issues
Crowdfunding miss	Medium	Medium	Flexible goals; MVP already built
Player churn	High	Medium	30-day seasons; weekly content; BP loop
Coding hire doesn't work out	Low	Medium	AI tools reduce dependency; contract first

13.1 Regulatory Considerations

- Loot Box Compliance: Pack purchases show exact odds (Common 60%, Rare 25%, Epic 10%, Legendary 5%). No hidden mechanics. Compliant with EU requirements.
- Age Rating: No real gambling. In-app purchases clearly labeled. Target PEGI 7 / ESRB E10+.
- Privacy: GDPR and CCPA compliant. Minimal data collection. No third-party data sales.
- Payment Processing: PCI compliance handled by Stripe and PayPal — no card data touches our servers.

14. Appendix

14.1 Technical Stack

- Frontend: React 18, TypeScript, Tailwind CSS, shadcn/ui, TanStack Query, Wouter
- Backend: Express.js, TypeScript, PostgreSQL (Drizzle ORM), WebSocket (ws)
- Platform: Replit (development, hosting, database, deployment — all-in-one)
- Payments: Stripe Checkout + PayPal REST API
- AI: Google Gemini 2.5 Flash (deck suggestions + card art generation)
- Auth: Replit Auth (OIDC) + JWT for mobile

14.2 Live Product URLs

- Web App: <https://wisdom-and-chance.replit.app>
- API Docs: <https://wisdom-and-chance.replit.app/api/api-docs>
- Health Check: <https://wisdom-and-chance.replit.app/api/health>
